Responsibilities
- Convert design files created in Figma into fully functional web pages using HTML and CSS
- Design and build the UI for a system that allows customers to manage templates used for automated messaging

Technologies: ReactTs, Redux, Material UI

PERSONAL PROJECTS

These are Software Projects that I developed by myself.

Kpop-radar

https://clone-kpop-radar.vercel.app/

Technologies: ReactJS, Redux toolkit, RTK Query, Tailwind CSS
Description: This is a frontend clone of Kpop-radar's website, a platform that delivers objective insights by monitoring and analyzing an artist's fanbase size, growth trajectory, and accomplishments across social media channels.

EMR Landing Page

https://emr-demo.netlify.app/

Technologies: HTML, Tailwind CSS, Javascript
Description: This landing page introduces a management and patient care system for clinics and hospitals. It streamlines administrative tasks, enhances patient experience, and optimizes operations, supporting efficient scheduling, medical records management, and treatment tracking.

Online Booking Movie Tickets

https://tix-movie-ticket.vercel.app/

Technologies: ReactJS, Redux, Sass, Axios
Description: Clone Tix.vn - a website to book movie tickets online at theaters such as BHD, Galaxy, and CineStar.

EDUCATION & CERTIFICATIONS

VNU HCM-University Of Science Ho Chi Minh City | 2018 - 2022
Information Technology

Cybersoft academy | 2020
Front-end Course

TECHNICAL SKILLS

HTML/CSS	Javascript, Typescript	Golang
Bootstrap, Sass	React	MongoDB
Tailwind CSS	React Native	VueJs
MUI	NextJs	Unit test
Git	Redux
